

Group 2: Avinash Haritsa, Danielle Ho, Alex Sowatzka, Jed Fox, Leeza Kurtz

Assumptions

- All the legs from a fliers flight is from the same airline and uses the same airplane
- Each airplane can only support one flight at a time
- All legs are included in one ticket
- Airline that don't participate in owns relationship are "virtual/shadow"
- Boarded tracks if passenger got on plane in case of emergency
- Departure and arrival time included in order to interpret total time of flight
- Total people in airport only include people in database
