

**Unhandled Constraints:**

- Ensure that each jet plane has at least 2 pilots
- Ensure that each propellor plane has at least 1 pilot
- Ensure that the pattern for most identifying information for entities includes letters then a number (ex: p10) (no check constraint for some id attributes)
- Ensure that if a flight's status is onground, the progress is 0
- Ensure that a plane has not reached its maximum seat capacity
- Ensure that a flight is removed once it's reached the end of its cycle (when progress reaches the desired number)
